

# TRANSPOREON DIGITAL CARRIER CERTIFICATE

Intra-Community deliveries can be made VAT-free within the EU. However, obtaining confirmation of receipt or other proof of export is often complicated and time-consuming. With a Transporeon digital carrier certificate, you fulfil the document obligation directly in the transport assignment system - automatically, digitally and legally secure!

## DIGITAL CARRIER CERTIFICATE:

### ELECTRONIC CREATION

For intra-Community deliveries, carrier certificates can be created electronically

### DIRECT DATA TRANSFER

Required information is automatically transferred from the transport data to the carrier certificate

### UNIFORM FORMAT

Documents are prepared based on the specifications of the responsible tax authority

### COMPLETE OVERVIEW

Certificates are stored centrally on the platform and can be filtered and searched

### ONE-CLICK CONFIRMATION

Carriers can confirm the delivery to other EU countries with just one mouse click directly in the platform

### CONFIRMATION VIA GEOPOSITION

If compatible visibility solutions are used, exports can be automatically confirmed via the vehicle's GPS position

## CHALLENGES:

- **Obligation to provide documentary evidence requires third-party cooperation:**

The shipper is dependent on the carrier to provide the export certificate. The more cumbersome and time-consuming it is for the carrier to submit proof of export, the less motivated he is to cooperate.

- **Incomplete and incorrect documents:**

Manually created certificates are prone to errors, possibly incomplete or may not meet legal requirements. Documents transmitted via different channels do not always reach the right contacts and can get lost. These delays can significantly affect downstream processes.

- **Scattered document storage:**

Export documents are received in different forms, some of them paper, at different points of the transport journey. It is difficult and time-consuming to search for the current status of all verifications. Under certain circumstances, the provision of evidence may be omitted due to this lack of transparency.

## ELECTRONIC CREATION OF PROOF OF DELIVERY:

**#1**  
Shipper assigns digital transport via Transporeon platform

**#2**  
Carrier confirms delivery in other EU countries and creates the carrier's certificate with one click

**#3**  
System generates the complete carrier certificate based on shipment data

## ADVANTAGES:

- ✓ Carriers can easily create their certificate with just one click
- ✓ Automatic storage of export certificates on the platform with search function enables quick access and complete overview
- ✓ No time delay as the carrier's certificate can be issued and transmitted immediately upon confirmation of delivery
- ✓ Consistent digital process delivers complete correct data by taking it from the transport order
- ✓ Automatic messages can be used to remind carriers to submit the confirmation. - manual follow-up is no longer necessary
- ✓ The process is approved once by the responsible tax authority, then legal certainty is guaranteed
